

With Google Chromebooks, Students and Faculty Can Now Access Windows Applications & Desktops and All Websites

WITH ERICOM ACCESSNOW™ – GOOGLE CHROMEBOOKS OFFER A COMPLETE EDUCATIONAL ACCESS PLATFORM!

Empower students and staff to access all of their applications — Google Apps, and Windows applications, virtual desktops and all websites. All you need is a Chromebook and an Internet connection.

Ericom delivers AccessNow — a pure HTML5 RDP Client, providing access to Windows applications and virtual desktops running on Windows Terminal Services/RDS/VDI platforms directly from Chromebooks.

THE CHROMEBOOK AND ACCESSNOW COMBINED SOLUTION

- Does away with Windows PCs software management. Does not require Java, Flash, Silverlight, ActiveX or any other underlying technology on the end-user device, significantly reducing IT overhead.
- Gives students and faculty the mobility to access Windows apps, desktops and websites from anywhere (school, library, home, lab, field). Using AccessNow students can connect through the internet and access their Windows desktops and applications directly from within the browser.

REAL BENEFITS!

AccessNow and Google Chromebooks are the ideal solution for education; schools that need to provide access to both Windows applications and desktops and websites, with ZERO client installations:

- Simple, easy and inexpensive to maintain, works through the browser on all devices, for non-Chromebooks it does not require any upgrades or patches on the user's device — NO software installation of plug-ins required.
- Providing students with Chromebooks rather than PCs, makes life very easy for system administrators
- Enables BYOD implementations — supports access from any HTML5 compatible browser on *any* platform, including Chromebook, Windows, Mac, Linux, iPad/iPhone, Android, etc.
- Work with your Web apps and any Windows applications — simultaneously!

HOW DOES ACCESSNOW WORK?

It's so simple! All you need is a Web-browser, and an internet connection.

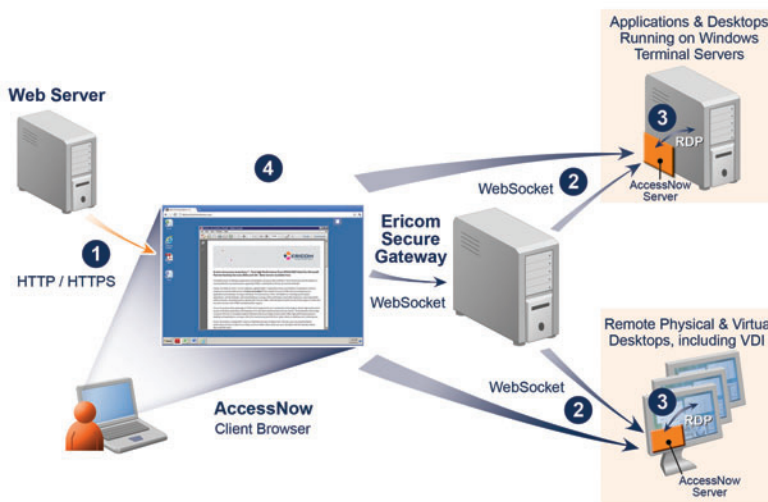

- Open the web page
- Enter your log-in credentials
- Click 'Connect' — The desktop (or application) appears directly inside the browser window
- That's it.

Alternatively, Ericom AccessNow can be integrated into the school's portal and by simply clicking on an icon the user will connect to their Windows apps or desktop.

"AccessNow fits right in with our goal to provide students with a computing experience that closely matches the traditional, full desktop computing experience and is affordable and productive ... We quickly discovered how easy AccessNow is to deploy and use. You simply log in and you have your Windows desktop. It just works."

Tommy Carter, IT Systems Engineer for
Richland School District Two

ERICOM ACCESSNOW COMPONENTS:

1. End-user navigates to the AccessNow URL to start the connection.
2. Client connects to AccessNow Server using WebSockets — AccessNow Server is usually installed on RDP host itself.
3. AccessNow Server translates WebSocket communication to/from RDP
4. Remote Windows desktop/application UI is displayed inside the browser window

NOTE: Optionally, client connects to AccessNow Server through Ericom Secure Gateway
