# PowerTerm® WebConnect DeskView

## Anytime, Anywhere Secure Access to Virtual Desktops

Ericom® PowerTerm® WebConnect DeskView provides secure anytime, anywhere access to desktops, hosted on leading virtualization platforms, e.g., VMware, Microsoft, Xen and Windows Terminal Servers and Blade PCs. With desktop virtualization, organizations install and run Windows or Linux desktops on virtual machines (VDI), Windows Terminal Servers or on both, instead of on local PCs, significantly reducing the cost and complexity of application and desktop management.
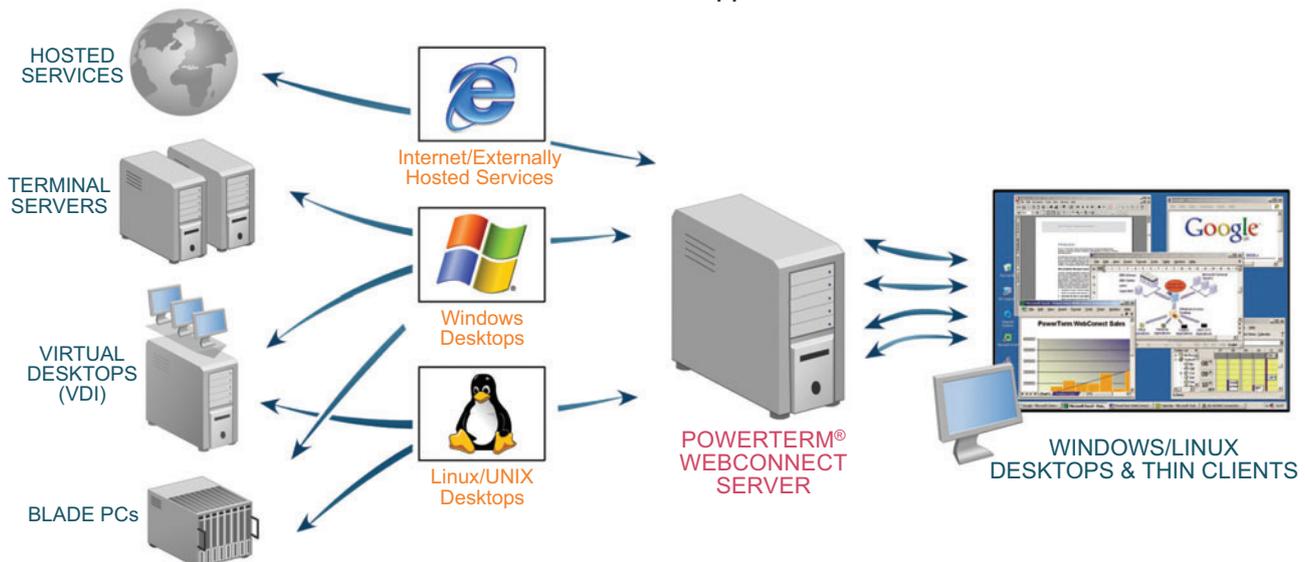

## What's the Challenge?

Organizations today seek to align IT with key business objectives — reducing the cost of managing PCs, lowering TCO, improving security and manageability, and facilitating disaster recovery and business continuity. An enterprise-wide virtualization approach can achieve this alignment, yet it presents its own set of challenges. For organization implementing Terminal Services, 20-30% of users are unable to fully leverage its benefits due to application compatibility issues and core IT requirements. Alternatively, organizations with VDI environments often limit their virtualization deployments due to high costs, power consumption and space requirements.

## Leveraging The Best of Both Worlds

Ericom's enterprise-wide virtualization approach empowers organizations to optimally combine Virtual Desktops and Windows Terminal Servers and Blade PCs. Extending enhanced Terminal Services benefits to virtual desktops, Ericom's PowerTerm WebConnect enables organizations to achieve 100% desktop virtualization.

## POWERTERM WEBCONNECT DESKVIEW FEATURES & BENEFITS

- **Centralized management and control:** A single console for managing large groups of servers and users

- **Managed user access:** Centrally manage and balance VM pools, enhancing server performance and scalability

- **Regulatory compliance:** Customizable logging and auditing capabilities enable monitoring and auditing users' access to applications, services and documents

- **Improved user experience:** Provides access to multiple applications that cannot reside on the same desktop

# Ericom's Robust And Cost-Effective Solution For Virtual Desktop Deployments

### ■ Enterprise-wide Desktop Virtualization
- Virtual Desktops (VDI)
- Blade PCs
- Windows Terminal Servers

### ■ Enhanced Productivity & User Experience
- Full Desktop & Application Publishing
- Automatic Client Provisioning
- Intuitive Web Interface & Application Launcher
- Virtual Desktop Reconnect

### ■ Centralized Management
- VM Pool Management
- VM Status Monitoring
- Policy Enforcement

### ■ IT Flexibility
- Multi-Virtual Desktop OS support
- SSL VPN Integration
- Windows & Linux Desktops, Thin Clients

### ■ Built-in Enhanced Security Support
- Single Sign On
- Active Directory and LDAP
- RSA SecurID two-factor authentication

### ■ Reduces Management Overhead
- Integrates with Microsoft Active Directory and Novell eDirectory
- Automatically identifies existing users and groups
- Reduces user management overhead and setup time

## PowerTerm® WebConnect Product Line

PowerTerm WebConnect provides secure, centrally managed, on-demand access to enterprise-wide applications, desktops and data — from Windows and Linux desktops, and thin clients.

### ■ PowerTerm WebConnect Enterprise
Provides secure, centrally managed access to applications and desktops (Windows or Linux), running on any combination of Windows Terminal Servers, Virtual Desktops, Blade PCs and legacy hosts

### ■ PowerTerm WebConnect RemoteView
Provides secure, centrally managed access to applications and desktops (Windows or Linux), running on any combination of Windows Terminal Servers, Virtual Desktops and Blade PCs

### ■ PowerTerm WebConnect Deskview
Provides secure, on-demand access to desktops, hosted on leading desktop virtualization platforms (VMware, Microsoft, Xen, etc.), and on Windows Terminal Server and Blade PCs

### ■ PowerTerm WebConnect HostView
Provides Web-based access to legacy applications, with support for over 35 terminal emulation types

## Ericom – Access Done Right

Ericom® Software is a leading provider of Application Access and Virtualization Solutions. Since 1993, Ericom has been helping users access business-critical applications running on a broad range of Microsoft® Windows® Terminal Servers, Virtual Desktops, Blade PCs, legacy hosts, and other systems. Ericom provides concrete business value by helping organizations realize the benefits of their IT investments. With offices in the United States, United Kingdom, EMEA, India and China, Ericom also has an extensive network of distributors and partners throughout North America, Europe, Asia and the Far East. Our expanding customer base is more than 30 thousand strong, with over 7 million installations.
