

ENDPOINT SECURITY IDENTIFIED\* AS WEAK SPOT IN  
**CYBERSECURITY STRATEGY**  
AND TOP GOAL FOR SECURITY PROFESSIONALS

75% of cybersecurity professionals named  
**“IMPROVING ENDPOINT SECURITY”**  
as one of their two top security project goals

**48%** | considered it as their top goal

**29%** of cybersecurity experts surveyed named  
“becoming compliant with mandatory regulations”  
as their top security goal

An additional quarter of respondents designated it as their second most important goal

**OVER 90% OF SECURITY SPECIALISTS SURVEYED**  
work for companies with an active cybersecurity strategy

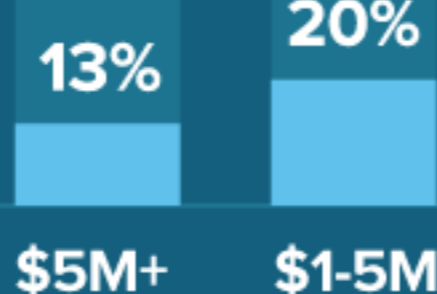

However, only about half of them are “very confident”  
that their strategy will pre-empt Internet-borne threats

**ALMOST ONE THIRD**  
of respondents’ organizations  
have been victims of cyberattacks

**13%**  
reported financial impact of  
**OVER \$5 MILLION**

**20%**  
reported financial impact of  
**\$1 MILLION - \$5 MILLION**

In the event of a cyberattack,  
**62.5% OF RESPONDENTS**  
said that their organizations could tolerate

**ONLY ONE**  
8-hour work day  
of downtime
